

Art Submission Guidelines

www.flagworks.com

Your image is important to us. The following guidelines have been prepared to ensure your project meets your expectations. Please feel free to contact the Art Department at (403)265.5595 or e-mail art@flagworks.com

Transfer Media

Flagworks accepts files on CD's and via e-mail. Please compress all art files sent via e-mail in either a ZIP or SIT format. Maximum size for e-mailed art is 9mb.

File Formats

Flagworks accepts art in Adobe Illustrator format. Quark & Coreldraw users need to export artwork as EPS files to be imported into Illustrator. All fonts should be converted to curves and all spot colors should be named as Pantone (solid coated) colors. Flagworks also accepts Adobe Photoshop (raster) files in PSD, EPS or TIFF format. Please avoid the use of JPEG format as it's compression engine degrades your image. All raster images should be set up with a resolution between 75 and 100 dpi at 1:1 scale.

Submission

Please prepare your files to scale (1:10 is ideal for most artwork) and send along a color hardcopy of your artwork. Any artwork not prepared to the above specifications is subject to additional setup charges. If you don't have access to artwork in the above formats, please contact your Flagworks Representative for a Design quote.

Original artwork provided as a photograph, drawing, painting etc., can be scanned to create your finished product. Additional charges apply, please advise your Flagworks Representative if you are sending Original Artwork and the additional charges will be reflected on your quote.

Quotations are given assuming submission of art in the above formats, you will be notified if your artwork doesn't meet the above criteria and an additional artwork charge will be added to the quoted price.
